Two feet of gravel & very hard " " " " " " Work suspended & shaft caved 5 feet of snow was thrown from over the shaft. the thermometer was buried in bottom same as at Dec 17. when this temp° was taken Very tenacious clay & gravel. Thermometer buried each time over night. Dry & easily worked Excavation done for work. Quite dry. Struck frozen Dry. Struck clay & struck impregnated chlorine Quite dry Dry & very hard 2 ~~Dry~~ Struck & fine gravel Suspended work Resumed work after sinking out about foot of water No more came in

Timbers covered with ice when the snow fell
Black, when melted resembled mud taken from docks.
Large pieces of pure fresh water ice with gravel
Put in a flask which froze out without moving any earth

Resumed work Nov. 23d finding cold Temperature of store cellar for pumps +16°2 on same level of bottom of shaft

Continuing sufficient water to firmly petrify ice when frozen

" " " "

Feb. 10th & 11th 1853 a pair of wooden gates formed across pavements of clam shell at 27.3 planked work on the 14th on the morning of the 18th formed water + mud in bottom of shaft, with temperature of earth +14. Water very salt. stood at 15° when strength to the surface
